LAWRENCEBURG POLICE DEPARTMENT

From Handwritten Reports to a Fully Connected Force - How the Lawrenceburg PD modernized

The Starting Point

- Handwritten reports and a legacy RMS made retrieval slow and accreditation painful.
- Citizen complaint reviews took one to two days.
- Promised evidence tools that never arrived.

Why Caliber

- Works with the county's existing Caliber CAD, avoiding costly data bridges and enabling future data sharing.
- Easy for officers and supervisors to use.
- Best value for public dollars.

At a Glance

- 36 sworn officers
- 12.5 square miles
- ~14,000 residents, ~20,000 daytime
- ~1,000 calls per month
- Caliber solutions: CAD, Mobile CAD, Online RMS, Evidence Management, NCIC/CJIS Mobile Access, AVL

Impact at a Glance

The department finds reports in under three minutes, and generates traffic stop heat maps in five minutes for. Supervisors resolve reviews in hours, investigators connect names, associates, vehicles, and addresses with one search, and Mobile CAD even helped attract a new detective.

Go-Live Support

Caliber's project lead was on-site through launch and data migration, mapping and preserving legacy data. The team learned to handle updates in minutes, including adding new statutes on their own. "Our transition into Caliber was phenomenal. It was easy."

Results

- 90% faster citizen complaint investigations
- 80% decrease in time to compile accreditation & grant stats
- 90% drop in officer complaints
- 70% faster access to incident records

Testimonial

"A very efficient expenditure of the tax dollars."
— Lt. Ben McDow

Conclusion

Caliber helps the department respond faster, strengthen accountability, and reduce administrative workload. It provides a practical, connected toolset built by and for public safety professionals.
